

S1 Table. Oxygen consumption rates in the OMZs off Namibia and Peru. Adjusted $^{18-18}\text{O}_2$ concentrations are given in the method section. The upper Peruvian OMZ is here loosely defined by $\text{O}_2 \geq 0.5 \mu\text{mol l}^{-1}$, except for station 805 where higher O_2 concentrations persisted throughout the OMZ. SE = standard error; n.a. = not available; b.d. = below detection; * STOX sensor measurements.
