

Table S1. Comparison of overlap in genes between PD-related transcriptomic studies

The following table illustrates the increase in data convergence between PD-related transcriptomic studies following the implementation of our common analysis methodology

	Number of genes in common	
# of Studies	From the 11 published gene lists	From the 13 gene lists after common analysis
8	0	0
7	0	2
6	0	20
5	0	53
4	0	170
3	8	565
2	54	1389
1	693	3385
