

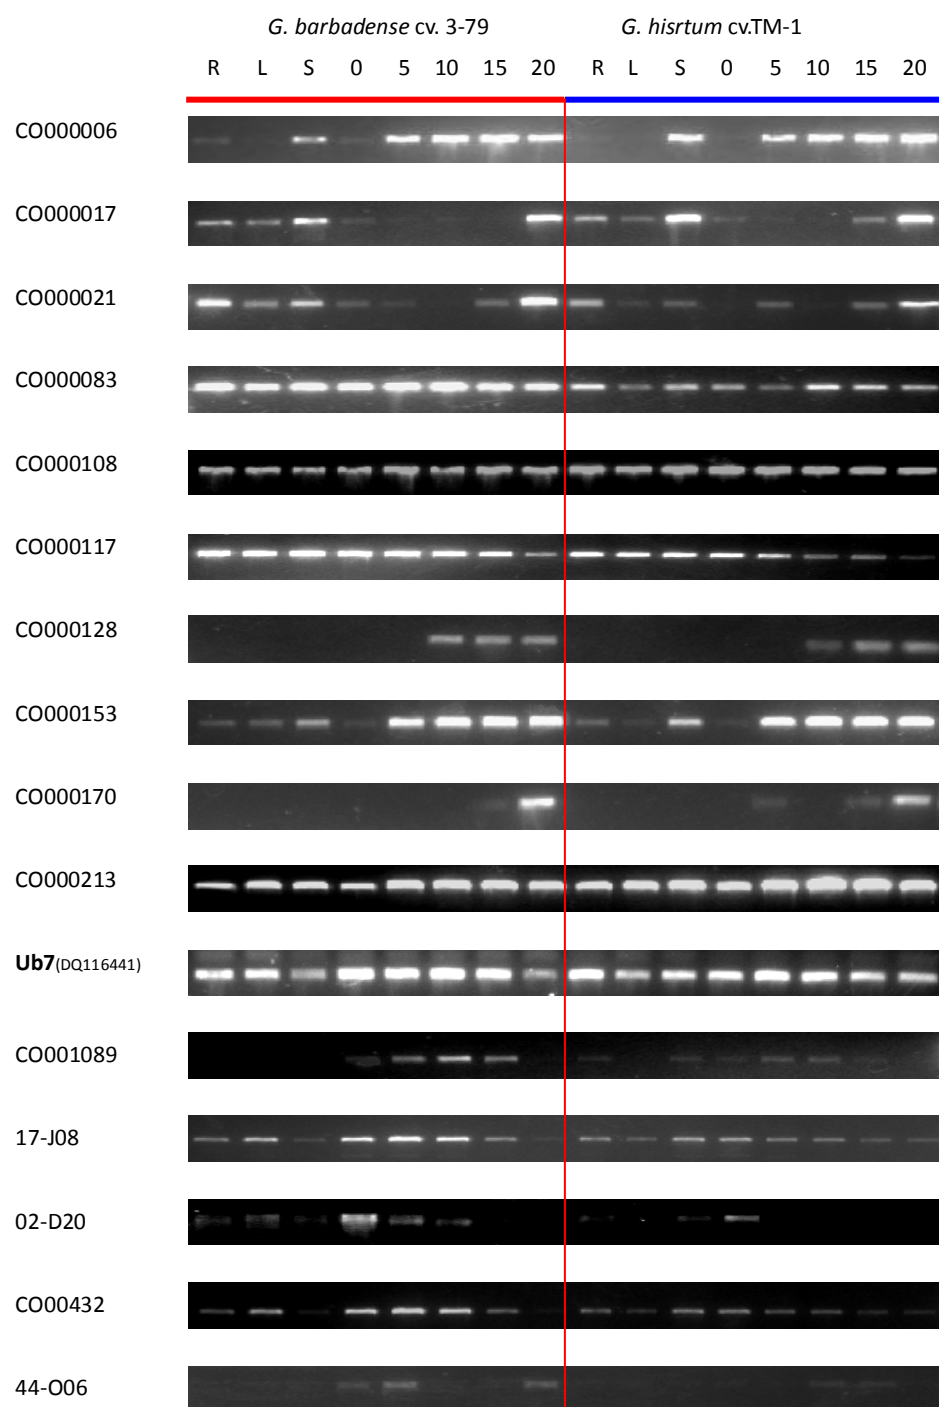

Figure S2. Expression analysis of 15 representative unigenes by RT-PCR method. The first ten are selected from the list of enriched unigenes, the latter five are from the list of *G. barbadense* putative specific sequences. R, L, S, 0, 5, 10, 15 and 20 represents the tissue of root, leaf, stem and 0, 5, 10, 15, 20-days post anthesis (DPA) fibers.
