

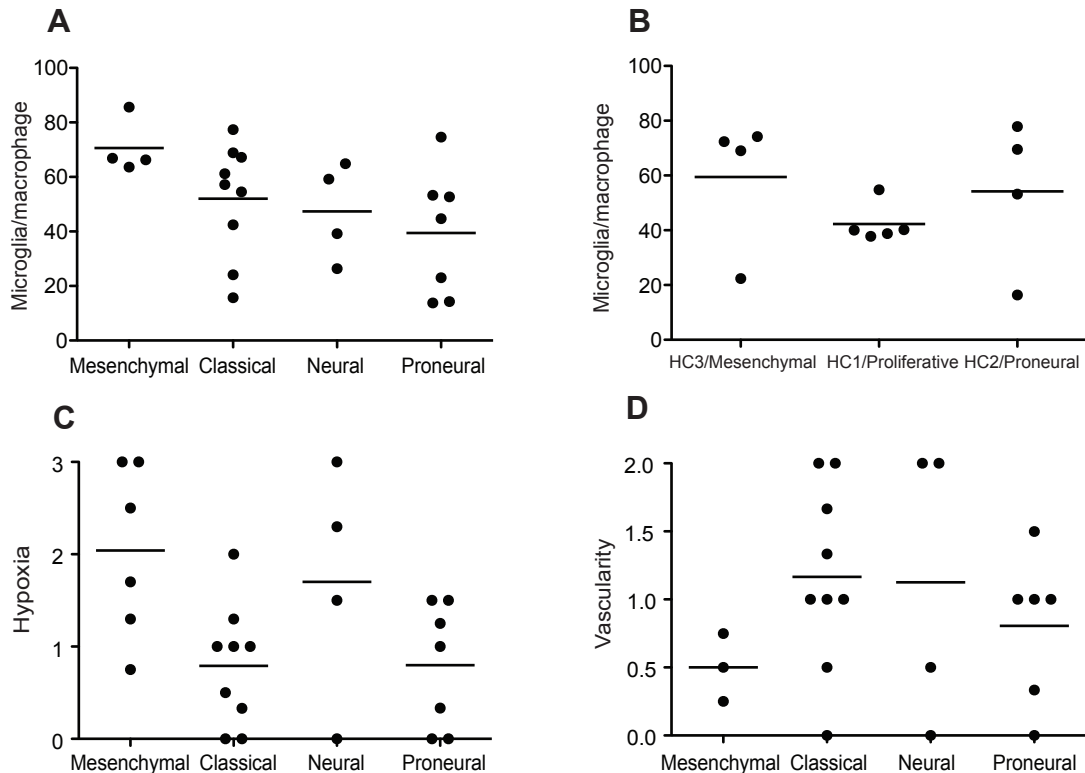

Figure S4. Subtype specific comparisons of microglia/macrophage cell number, hypoxia and vascularity in adult and pediatric astrocytomas. Subtype specific comparisons of **(A)** microglia/macrophage cell numbers per 400x field (Iba1 immunostaining) in adult GBM and **(B)** pediatric astrocytoma (grades II, III and IV), **(C)** hypoxia (CA9 immunostaining) in adult GBM and **(D)** vascularity (CD34 immunostaining) in adult GBM.
