(a) Gene/node details, and (b) significantly enriched gene sets, for the MAP-kinase module found as significant in the LUSC data set. *Q*-values in (b) indicate significance of enrichment in the corresponding gene set by the genes in this module, calculated according to a one-sided Fisher's exact test. Further details about these gene sets can be found from the website of the Broad Institute Molecular Signatures Database (<http://www.broadinstitute.org>).
