Figure 1 is a line graph showing the evolution of the global mean annual concentration of atmospheric methane (ppb) from 1960 to 2013. The x-axis represents the Year (1960 to 2010), and the y-axis represents the Methane concentration (ppb) (1500 to 2000). The graph includes data from UN IGME 2012 (solid blue line), UN IGME 2013 (solid red line), and a Default Loess fit (dashed blue line). It also shows various other data series: pink circles, green circles, brown squares, black squares, and blue circles, some connected by dashed lines. A shaded red area indicates a confidence interval around the 2013 data.
