

Supplementary information for “Catchment vegetation and temperature determine the strength of trophic interactions between zooplankton and phytoplankton”

Table S1: Sampling locations with lake characteristics, given with coordinates (decimal latitude and longitude in WGS84, EPSG:4326), elevation (m.a.s.l), perimeter (meters), Area (square meters), Maximum depth (cm), presence or absence of fish and sampling dates (day.month, 2013) for zooplankton, chlorophyll *a*, and water samples.

locationID	Latitude	Longitude	Elevation	Perimeter	Area	Maximum depth	Fish	Dates
1	74.3231054	-20.184435	110	1100	69783	>300	yes	18.7,26.7,1.8,7.8
