

Topic guide for focus groups (service users and service providers)

These questions * relate to the model of care with which you are most familiar

- Did the model of care cover all the necessary bases – e.g. health promotion, screening, care planning, managing complications?
 - E.g., does / did it provide the necessary care for woman whatever their risk level?
- What do you feel about the organisation of care?
 - E.g., is / was it accessible, of good quality, and adequately resourced?
- Do you feel that women are shown respect within this model of care?
 - E.g., is / was care tailored to the needs of individuals?
- Is / was the care based on a promoting normality and strengthening women's capabilities?
 - E.g., does / did it follow expectant management, intervening only when necessary?
- Do / did care providers demonstrate both knowledge and skills, and an awareness of how to use these most effectively?
 - E.g., are roles and responsibilities based on need? On resources?

** questions are based on the QMNC Framework.*

Present tense to be used for pregnant women and service providers; past tense to be used for postnatal women.
